

REIVERNET GUEST TV

Stay connected with your guests during their stay and promote your hotel brand with Reivernet's Guest TV solution.

Smart television in-room entertainment systems are now commonplace in hotels. Reivernet Guest TV lets you capitalise on this technology with its high-definition, customisable, content rich interface.

Give your guests everything they need to make the most of their stay with centralised information on your hotel, promotions, local attractions, and in-room amenities, including room service ordering. It's convenient, reliable and easy-to-use.

PROMOTE YOUR BRAND

Reivernet Guest TV's interface makes it easy to promote your brand. Incorporate your logos, style guide and hero shots into its library of templates to deliver a unique, customised interface for your guests.

WELCOME YOUR GUESTS

As the solution is linked to your hotel's Property Management System (PMS), customised welcome messages, with the option of a video inlay, can be

automatically generated at check-in and guest room TVs turned on – waiting to welcome your guests when they arrive in their room.

CUSTOMISABLE GUEST DIRECTORY AND CONTENT

Engage your guests with an innovative presentation of promotions, local attractions, hotel facilities, and guest services. Do away with paper-based in-room information folders with a customisable on-screen directory.

SMART TV MESSAGING

The messaging system lets you directly contact guests, a group, or a conference. Messages can be created using the interface menu and, in the event of an emergency, audio evacuation information can be played through all TVs.

ROOM SERVICE ORDERING

Guest can browse the Room Service menu and order through their TV. The order can be charged to the guest account via the PMS interface and the order sent to a kitchen printer. Alternatively, using the point-of-sale interface with the ORACLE Symphony, a check can be raised in Symphony and sent to the kitchen terminal.

TV CHANNEL LIST AND GUIDE

Reivernet Guest TV's comprehensive Electronic Program Guide (EPG) for free-to-air and subscription TV is easy to navigate. The TV channel list can be sorted by genre or country, making it easy for guests to find their favourites.

MULTI-PLATFORM SUPPORT

Reivernet Guest TV is designed to seamlessly integrate with leading commercial TV vendors and set top boxes, including:

- Samsung Hospitality Smart TV
- LG Commercial Smart TV
- Philips Hospitality TV
